

Sebastian Stanton

Junior Full-Stack Developer — JavaScript / React / Python

Cape Town, South Africa • 079 244 8774 • ssebastianbusiness@gmail.com • [LinkedIn](#) • [GitHub](#) • [HyperionDev](#)

PROFESSIONAL SUMMARY

Aspiring full-stack developer with a HyperionDev Full Stack Web Developer certification in JavaScript, React, Node.js, Express, and MongoDB, building on a foundation in Python, SQL, and object-oriented programming from an earlier software engineering bootcamp. Brings 9 years of professional experience in medical aid administration, having thrived in fast-paced, high-accuracy roles, with a consistent record of process improvement, self-directed learning, and clear technical communication. Seeking a junior full-stack developer or graduate developer role to apply strong JavaScript/React skills alongside Python fundamentals.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, HTML5, CSS3
- **Frontend:** React (Hooks, Routing, State, Form Validation), Bootstrap, Responsive & Accessible Design
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware
- **Databases:** MongoDB/Mongoose, SQL, SQLite
- **Tools & Practices:** Git & GitHub, Agile, OOP, JSON & Web Storage APIs, Async/Await & Promises, Automated Testing

FEATURED PROJECTS

To-Do Tasks App (Capstone) — React, Express, MongoDB, JWT [\[repo\]](#)

- Built secure user registration and login with JWT-based authentication, hashed password validation, and protected routes restricting task access to logged-in users.
- Structured the app into a full front end (components, context, pages) and back end (config, middleware, models, routes) for maintainability.

Tech: React · Node.js · Express · MongoDB · JWT · Context APIs

Jobs App (Capstone) — React, Express, MongoDB [\[repo\]](#)

- Built a job-tracking tool with submission forms (description, location, priority), status filtering, and batch status updates across multiple jobs at once.
- Originally built as a front-end-only app, later extended into a full-stack app connecting React to an Express/MongoDB backend via Axios.

Tech: React · Node.js · Express · MongoDB · Axios · REST APIs

Event Planner (Capstone) — React [\[repo\]](#)

- Built a React app for creating, managing, and tracking personal events, with a dashboard view, event validation, and persistent storage.
- Implemented user registration/login and a help page, using Context API for state management and Bootstrap for responsive styling.

Tech: React · Vite · Context API · Bootstrap

iTunes Search App (Capstone) — React, Express, JWT [\[repo\]](#)

- Built a full-stack app to search the iTunes API, filter results by media type (movies, music, podcasts, and more), and save favourites.
- Connected a React/Bootstrap front end to a Node/Express backend secured with JWT authentication.

Tech: React · Vite · Node.js · Express · JWT · Bootstrap

ADDITIONAL PROJECTS — JAVASCRIPT / REACT

- **TheCart** — React e-commerce app with routing, cart logic, and Formik-based form validation. [\[repo\]](#)
- **Chef's Favorites** — Ingredient-based ordering site — enter a main ingredient and the "chef" selects a dish, with pending-order tracking. Built with HTML5, CSS3, and JavaScript, consuming the TheMealDB API. [\[repo\]](#)
- **Developer Portfolio / CV Site** — Responsive Personal site using semantic HTML, CSS, and Bootstrap. [\[repo\]](#)
- **E-Commerce (Web Storage)** — Browser data persistence using cache, cookies, session storage, and local storage. [\[repo\]](#)

ADDITIONAL PROJECTS — PYTHON

- **Expense & Budget Tracker (Capstone)** — CLI app using SQLite with full CRUD for income/expenses, category-based filtering, and input validation. Theirs also per-category budget tracking against actual spend and a financial-goals feature calculating funds available toward a target, via a menu-driven interface. [\[repo\]](#)
- **E-Bookstore App** — CRUD-based catalogue management tool built with Python and SQLite. [\[repo\]](#)
- **Task Manager** — Multi-user task management tool with authentication and admin-only functionality. [\[repo\]](#)
- **Simple Calculator** — CLI calculator with a calculation history feature. [\[repo\]](#)

EDUCATION

HyperionDev — Full Stack Web Developer Bootcamp

Mar 2026 – Jul 2026

Curriculum: HTML/CSS/Bootstrap, JavaScript (ES6+), DOM & Events, System Architecture & HTTP, JSON & Async/Await, Git, Node.js, React (Hooks, Routing, Forms, Testing), Express.js, MongoDB/Mongoose, JWT Authentication.

HyperionDev — Software Engineering Bootcamp

Dec 2023 – Jun 2024

Python, SQL/SQLite, object-oriented programming, Git/GitHub, Sphinx documentation, Agile methodologies.

Sololearn — Python & Web Development Courses

May 2023 – Dec 2023

PROFESSIONAL EXPERIENCE

Medscheme — Bonitas, Digital Livechat Agent

Mar 2023 – Jul 2026

- Selected as one of the founding agents for Bonitas' first Livechat system; developed message templates and process standards later adopted team-wide.
- Identified and documented recurring issues with the Livechat system in collaboration with management, and was recognised for consistently proposing practical solutions.

Medscheme — Boncap, Back-Office Support

Sep 2019 – Feb 2023

- Handled claims assessment and membership administration; contributed to the development of "OneMind," a shared process-reference tool used by all Bonitas agents.
- Earned remote-work privileges through consistently high performance and received 3 performance awards.

Medscheme — Boncap, Admin/Call Agent

Feb 2018 – Aug 2019

- Consistently ranked among the top performers across 45+ agents while exceeding service-level targets and handling 60+ requests/day.
- Authored a training guide for new agents to speed up onboarding, later adopted as a team resource.

Earlier Experience

Aug 2017 – Feb 2018 · Jan 2014 – Jul 2017

- Non-Clinical Reviewer, Bonitas — managed pre-authorisation requests while maintaining high accuracy and communicating effectively with healthcare professionals.
- Call Operator, Delivery Xtreme — Processed high volumes of customer orders in a fast-paced, time-sensitive environment.
